PLENARY KEYNOTE SPEAKER

SHELBY JOHNSON
State Geographic Information Officer

Shelby is a native of Madison County, Arkansas and serves as the State Geographic Information Officer of Arkansas. He directs the Arkansas GIS Office and reports directly to the Governor. He previously worked as a Research Specialist at the Center for Advanced Spatial Technologies at the University of Arkansas. He has over 20 years of experience in Geographic Information Systems (GIS).

He has served several leadership roles in Arkansas and was instrumental in organizing the State Land Information Board which was later renamed the State GIS Board. Shelby is responsible for assisting the State GIS Board in building a coordinated GIS system to meet the needs of the people of Arkansas.

Shelby has been nationally recognized through serving on the National States Geographic Information Council (NSGIC) Board of Directors from 2001 to 2005. In 2001 he was selected to participate in the prestigious LeadAR program that grooms outstanding adults in Arkansas for future leadership roles. He was selected to serve on a research committee of the National Academy of Science developing a national vision for a landownership database of the United States. In 2007 he was honored with a Life Time Achievement Award by the Arkansas GIS Users Forum for his contribution to the GIS community, and in 2014 Shelby was elected as the NSGIC President.

He holds a Bachelor of Arts degree in Geography from the University of Arkansas. Shelby, wife Belinda and their son Luke live in Little Rock, Arkansas. In his spare time, Shelby loves riding bicycles and motorcycles, and kayaking.

CLOSING LUNCH SPEAKER

WILLIAM F. JOHNSON
Director at the Universal Service Administrative Company

Bill is GIS Director at the Universal Service Administrative Company. In this role he is designing and deploying GIS capabilities across all of the business units at USAC as part of an enterprise initiative to use data and analytics for more effective program management. Prior to joining USAC in March, 2016, he was the Geographic Information Officer for the state of New York where he was responsible for coordinating the use and deployment of GIS across all agencies in the Executive Branch. Bill spent 31 years in the field of GIS at several agencies including the Department of Transportation, the Office of Cyber Security, the Division of Homeland Security, and the Office for Information Technology Services. He holds an M.A. in Geography from Michigan State University and is a certified GIS professional, GISP.

STUDENT SCHOLARSHIP WINNERS

JOSHUA REYNOLDS, UNIVERSITY OF UTAH

Joshua Reynolds is a master's student in the geography program at the University of Utah. He will graduate this May. His areas of interest are GIS, Remote Sensing, and natural resources. When he is not writing python scripts at the DIGIT Lab, he is usually playing basketball, playing disc golf, or hiking some trail.

TOMMY THOMPSON, UTAH STATE UNIVERSITY

Thomas Thompson is currently a Master Student Candidate in Ecology at the Quinney College of Natural Resources and works as a Senior Geospatial Technician for the Remote Sensing and Geographic Information Systems Laboratory. He gained his Geography undergraduate degree with an emphasis in Bioregional Planning and Analysis, with a Minor in Geographic Information Systems (GIS). While gaining his a Bachelor of Science degree at Utah State University, his accolades include Geography Honor Society (Gamma Theta Upsilon), being a Service Learning Scholar, receiving the S.J. & Jessie E. Quinney College of Natural Resources Legacy of Utah State Award, and the Legacy of Utah Robins Award.

He has 6 years of conducting mapping analysis using various GIS and remote sensing software. The past 2 years he has focused on Remotely Piloted Aircrafts (RPA), commonly called drones, and Infrared thermography (IRT). Thomas really appreciates working with faculty and staff because he firmly believes that collaborative efforts help in the advancement of the geospatial sciences. His research creates new geo-spatial datasets that wildlife managers and researchers can use for wildlife and habitat monitoring applications.

Better Data, Better Decisions

With demographics on U.S. households and U.S. businesses, state and local governments use our geo-coded data for:

- ✓ Transportation models and planning
- ✓ Emergency management
- ✓ Community planning
- ✓ Flood plain management research
- ✓ Revenue compliance & due diligence
